

CL 410 Fully Automatic Roll Cutter for Broke Rolls

The Core Link Roll Cutter (patented) cuts the roll layer by layer and continuously feeds the paper to the pulper. The paper is dissolved faster and this reduces wear and tear on

the pulper. The result is less damage, fewer blockages, lower maintenance and down time etc. The machine manages any roll diameter and any paper grade, including tissue.

- Smaller pulpers can be used, saving new costly investments.
- The cores can be reused, saving money
- Less manual handling, saving time and giving better working environment
- No hydraulics leaking oil
- Different customized models

with conveyor

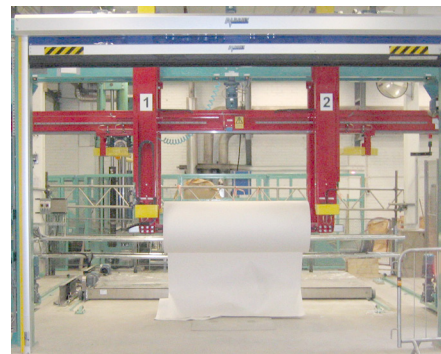

tilting plate

lamella sliding device

movable, rail system or rails on floor
